Tips on Skiing and Riding Lake Louise for Intermediate and Advanced Skiers / Riders

Intermediates and Better:
Run #39 should not be missed, nor should the combination of Runs #10 and #73. Run #25, Larch, can be delightful. Run #30 reached by Summit Platter (lift A), is a tremendous high alpine experience that is definitely worth a go whenever visibility is good.

For those skiers and riders who are seeking the thrills of black diamond runs, focus your attention to the backside alpine bowls, where areas like the "Jewelry Box" and the "Diamond Mine", will offer you a wide variety of super challenging steeps and chutes. These are great areas to head to on days with good visibility. On snowy or cloudy/dull light days, high end skiers and riders will want to check out places such as the Ptarmigan Glades (Runs #74 - #78), or places like Run #24 (Lynx run at the Larch Area) or the Men's World Cup Downhill Run #2, found on the front side of the mountain.

CAUTION

AVALANCHES

Lake Louise Mountain Resort is a mountain with some very steep terrain. Snow storms deposit huge amounts of fresh snow on the Rocky Mountains. Avalanche conditions within the ski area can become extreme. During hazardous periods, areas within the ski area are closed until avalanche control work is complete and the skiing is safe. Be aware of closures and avalanche stay out of closed areas so that control teams can do their work.

Lift pass suspensions may result.

OUT OF BOUNDS SKIING

The Rocky Mountains surrounding Lake Louise Mountain Resort offer exciting and challenging terrain to the experienced traveller. There is a real danger of avalanches outside the ski boundaries. Skiers must be prepared to travel on their terms, there is no avalanche control or ski patrol rescue. The slopes are steep and the snow deep, travelling outside the boundary is recommended only for those people experienced and equipped to deal with serious avalanche dangers.

ALPINE RESPONSIBILITY CODE

There are elements of risk that common sense and personal awareness can help reduce. Regardless of how you decide to use the slopes, always show courtesy to others. Please adhere to the code listed below and share with others the responsibility for a safe outdoor experience.

- 1 Always stay in control. You must be able to stop, or avoid other people or objects.
- 2 People ahead of you have the right-of-way. It is your responsibility to avoid them.
- 3 Do not stop where you obstruct a trail or are not visible from above.
- 4 Before starting downhill or merging onto a trail, look uphill and yield to others.
- 5 If you are involved in or witness a collision or accident, you must remain at the scene and identify yourself to the Ski Patrol.
- 6 Always use proper devices to help prevent runaway equipment.
- 7 Observe and obey all posted signs and warnings.
- 8 Keep off closed trails and closed areas.
- 9 You must not use lifts or remain if your ability is impaired through use of alcohol or drugs.
- 10 You must have sufficient physical capacity, ability and knowledge to safely load, ride and unload lifts. If in doubt, ask the lift attendant.

Know the Code - Be Safety Conscious - It is Your Responsibility

Lift System

LIFTS	LENGTH	VERT.	CAP./HR.
Summit Platter	3,670 ft/1,119m	1,345 ft/410m	900
Grizzly Express Gondola	6,671 ft/2,031m	2,414 ft/736m	1,750
