Comparison of New Zealand ski resorts (and a few Australian ski resorts) statistics including annual snowfall, vertical, elevation, mix of terrain for differing abilities, lift ticket prices and information on the location of accommodation for that ski resort

* reliable information not available

NZ lift ticket prices are in NZ dollars and are 2013 season prices.

Australian resort prices are in AUS dollars (inclusive of taxes)

Many resorts offer various packages and discounts on lift tickets, but prices quoted are the basic 1-day price to provide an indication of cost

The definitions of "child" and "youth" vary somewhat between resorts. Check the resort websites for accurate definitions of the categories.

To assist with the definition of "child" where it is free, we have provided the age under which children can ski for free.

The definition of "youth" in Australia is very inconsistent with NZ. For example, Mt Hotham "youth" is aged 15-18.
